

Commuting has a **real impact** on employees' **motivation** and **well-being**.

Car, train, bike, bus, Uber, taxi... offer your employees a tailor-made **mobility plan** thanks to **Mobility Edenred!**

# From car-centric to user-centric

The **mobility budget** allows employers to offer their employees a dedicated **budget** in exchange for the "classic" company car.

The employee is free to divide his budget between **3 pillars** :

The employee transfers **from a unique advantage** to a **multiple one**, completely **flexible**.

 The mobility budget can also be used to pay (part of) the rent or loan interest (under conditions).

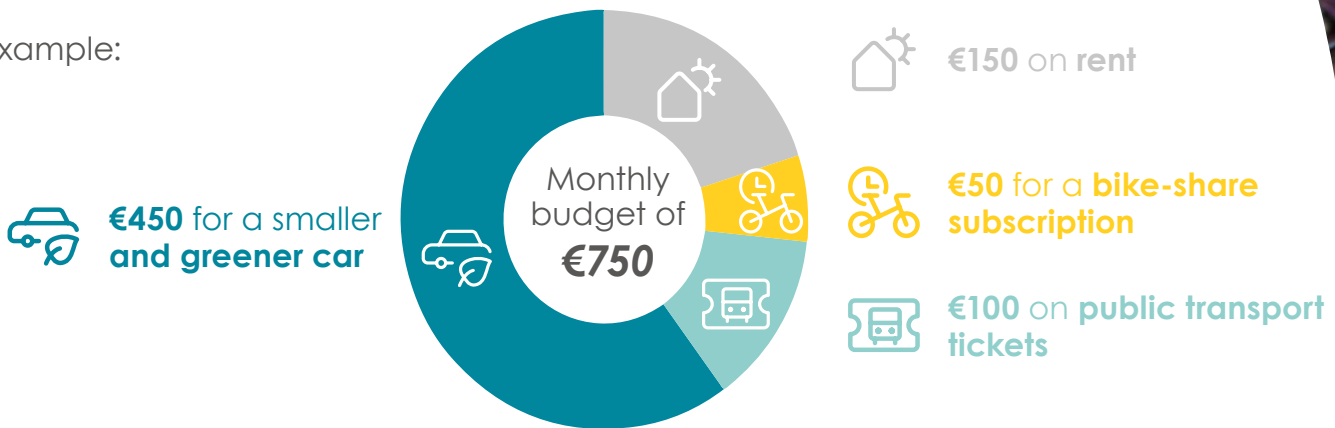

## The advantages of a tailor-made mobility

# Mobility Edenred, how does it work?

1. You **calculate the amount** of the annual mobility budget per employee, based on the cost of their current company car (= Total cost of ownership).
2. You provide your employee with a budget on their **Mobility Edenred account**.
3. They use their budget via **the Mobility app and card** which works like a prepaid Mastercard.

Example:

## An intelligent and all-in-one solution

Easy-to-use app

Simple dashboard

Payment card

Allowing the **planning, reservation** and **payment** of journeys in real time, and budget **management** (balance, spending, CO2 report, etc.).

# A glimpse of our partners

Discover the whole network on <https://www.edenred.be/nl/werkgevers/mobility-edenred>
